

Abhijay Salvi

Atlanta, Georgia — (317) 993-9169 — abhijay.salvi@outlook.com — www.linkedin.com/in/abhijay-salvi — U.S. Citizen

EDUCATION

Georgia Institute of Technology (GT), Atlanta, GA

August 2024 – May 2027

Bachelor of Science in Computer Science and Math Minor, GPA: 3.94/4.00

Extracurriculars: Grand Challenges, Startup Exchange, Student Government, Medical Robotics, Big Data Big Impact

Relevant Coursework: Object-Oriented Programming, Data Structures & Algorithms, Intro to AI, Design and Analysis of Algorithms, Computer Architecture and Organization, Intro to Robotics and Perception, Discrete Math, Linear Algebra

WORK EXPERIENCE

Chief Technology Officer - Waresport

June 2025 – Present

- Directed global cross-functional team in iterative product development leading to 0 to 100+ user, integrating CI/CD pipelines.
- Led design and implementation of LLM and AI-based scheduling, resulting in 90% decrease in management time for users.
- Architected full-stack systems and delivered a custom CMS for dynamic content publishing, reduced update time by 50%.

Robotics Software Engineering Intern - United Parcel Service

June 2025 – August 2025

- Shipped a low-latency robot control with interface with real-time map streaming using Python and React.js.
- Built real-time AI models in Python to detect package overflow using computer vision with 95% accuracy.
- Integrated scalable backend and APIs to develop robotic last-mile delivery; presented to CEO, CTO, and stakeholders.

Software Engineering Intern - Performance Services Inc.

March 2024 – August 2024

- Developed backend tooling and RESTful APIs using FastAPI and Node.js to streamline cross-functional workflows.
- Prototyped GPT-based chatbot leveraging NLP techniques and prompt engineering, integrating into web services.
- Leveraged algorithmic optimization to boost ML pipeline throughput by 150%; implemented model training with scikit-learn.

RESEARCH AND PROJECTS

HAVEN: Hazard Alert & Visual Emergency Network

November 2025

- Constructed an AI-powered hazard platform (Next.js, Flask, Roboflow) with a 95%+ accurate vision transformer classification
- Integrated a SQLite-backed incident storage for incident verification and real-time dynamic A*-based routing to safe zones.

Project Limbo - Medical Robotics @ GT

February 2025 – Present

- Incorporated responsible AI principles for user safety, with focus on real-time feedback control loops.
- Engineered real-time Python-based ML models for EMG signal classification, enhancing robotic prosthetic responsiveness.
- Collaborated in agile research team to deploy embedded control systems and simulate performance across test environments.

PerfectPunch - Hacklytics (2nd place in Sports Track)

February 2025

- Designed end-to-end backend pipeline emphasizing performance, latency, and observability.
- Incorporated LLM (Gemini API) and developed RAG agent to generate contextual AI coaching insights.
- Utilized object detection with OpenCV to classify punches in real-time; used multi-threading for concurrent stream processing.

Agricultural Predictivity Forecast - Big Data Big Impact @ GT

September 2024 – January 2025

- Architected a large-scale data pipeline for crop forecasting using satellite time-series and ML classification models.
- Improved current yield prediction accuracy by 18% through model architecture tuning and input feature optimization.

SurgeVue - PennApps (1st place in AR/VR and 3rd place Overall)

September 2024

- Engineered real-time computer vision pipelines for continuous MRI frame analysis and tumor detection and AR overlay.
- Created Flask-based backend with API endpoints for smooth MRI image streaming and built a companion iOS app.

LEADERSHIP

Associate Director of Partnerships - Startup Exchange @ GT

July 2023 – Present

- Established 10+ startup and VC partnerships for GT's largest student-led entrepreneurial organization.
- Spearheaded high-impact recruiting, planning, along with speaker, judge, and VIP coordination for 300+ attendees.

Project Lead - Big Data Big Impact @ GT

September 2024 – Present

- Directing multi-semester AI research for social good; managing a team of 15+ in data-driven global initiatives.
- Secured community collaborations and guided cross-functional teams through GitHub-based workflows.

SKILLS

Languages: Python, Java, JavaScript, C/C++, HTML, CSS, VBA, SQL, SQLite, Swift

Core: Object-Oriented Programming, Data Structures & Algorithms, Databases, Redis, Machine Learning, UI/UX

Frameworks & Tools: PyTorch, TensorFlow, Pandas, OpenCV, NumPy, Flask, React, Git, CI/CD, Azure, AWS
